

Features

- LDO Low Noise Low-Dropout regulator
- Low IQ: 50 uA
- Available in multiple output versions: fixed and 4-8 bit programmable
- Maximum output current: 25 mA
- Ultra-high PSRR: 80 dB @ 20kHz; 70 dB @ 100kHz; 50 dB @ 1MHz
- Low Noise: 20 uV typical (20Hz to 20kHz)
- Large input range, from 1.8 V to 5.5 V
- Soft start and overcurrent protection
- Core area : 0.07 mm²

Applications

Applications Diagram

General Description

LDO: The SGC73025 is the 25 mA regulator of a family of low-dropout (LDO), low-power linear regulator LDO: P solutions for integration on SoC. Offers very high power supply rejection ratio (PSRR). The family uses advanced control techniques to achieve soft start-up, very low noise, excellent transient response, and excellent PSRR performance. The SGC73025 is stable with a 1.0 uF ceramic output capacitor. It is specified from $T_J = 40\text{ }^\circ\text{C}$ to $+125\text{ }^\circ\text{C}$ and is designed to achieve 3% overall accuracy (over Load/Line/Temp).
