SGC24300_01_GF_22FDSOI
TEMPERATURE

MEASUREMENT DIODE

Features

• Diode for temperature measurement

General **Description**

SGC24300_01_GF_22FDSOI is a silicon diode macro, for temperature measurement, designed for direct usage with SGC24212_01_GF_22FDSOI compact temperature measurement ADC IP. It is specified from TJ = -40°C to +125°C.

Applications

• In chip temperature measurement

Quick Reference

SYMBOL	DESCRIPTION	MIN	TYP	MAX	UNIT
V_{AVDD}	Analog Sup.	1.50	-	1.98	V
T _{SET}	Setteling time	-		1	μs
Temp	Temp Range	-40	-	125	ºC
